## Catalin ROMAN

### Current Position & Organization

Lead Software Architect in MAP BU, FREQUENTIS AG

### Key Achievements or Career Highlights

His expertise lies in bridging the gap between real-world aviation business needs and advanced software solutions, primarily collaborating with ANSPs and major airlines. Catalin's significant contributions include the enhancement of the European Aeronautical Information Database under EUROCONTROL, marking a milestone in the digitisation of aeronautical data. Moreover, his technical leadership was crucial in the design and implementation of Qantas Airways' Navigation Information Database
