

Our Speaker

Antonio LICU

Current Position & Organization

Chief Technology Officer (CTO) and Head of Digital Transformation - EUROCONTROL

Educational & Professional Background

Master degree in aerospace engineering (Avionics) - Bucharest Politehnica University, Air Traffic Controller (Romania) & ATCO Instructor (UK College of ATC) and alumni on London Business School (Digital disruption)

Key Achievements or Career Highlights

Safety Culture and Just Culture are two key areas, where Tony's aimed to clarify and promote the concepts. In the past 15 years together with his team, Tony has pushed a paradigm change in Safety management thinking. Safety management should move from ensuring that 'as few things as possible go wrong' to ensuring that 'as many things as possible go right'. This perspective is termed Safety-II or rather System Thinking and relates to the system's ability to succeed under varying conditions. Safety must be considered in the context of the overall system, not isolated individuals, parts, events or outcomes. Since 2022 he is overseeing the iNM Programme the digital transformation vehicle for EUROCONTROL

Hobbies & Personal Interests

Water polo, swimming and motor sports (Formula 1 and Moto GP)

Motivation

Making a difference every day and grow the new generation of professionals
