

# Our Speaker

## Daniele RUSCIO

### Current Position & Organization

Lead Human Factors Engineer – Deep Blue

### Educational & Professional Background

I am a Human Factors expert and Cognitive Psychologist, with a PhD in Traffic and Transportation Psychology. I work on consultancy and research projects in the aviation, automotive, and manufacturing sectors, focusing on ergonomics and the assessment of human performance across various systems, HMIs, and support tools for next-generation aircraft/ATM systems

### Key Achievements or Career Highlights

Worked in the Human Factors Engineering and Flight Deck department at AIRBUS Defence and Space, where I contributed to the design, evaluation, and development of flight technologies for future aircraft systems. Worked at Konica Minolta Global R&D Digital Services on developing AI-based solutions, computer vision applications, and API-based services. Lecturer in the Psychology Department and Master Courses at 'Università Cattolica di Milano' and 'Politecnico di Milano'

### Hobbies & Personal Interests

Motorsports (just watching) and music

### Motivation

Act as a spokesperson for the needs, complexities, and specific characteristics of how human beings function within organizations and complex systems, in order to help incorporate sustainable perspectives
